"CR-C" type glands, certified Flameproof Ex d, Increased Safety Ex e & Restricted Breathing Ex nR are suitable for use in Zone 1, Zone 2, Zone 21, Zone 22, Group I Mining, Gas Groups IIA, IIB, IIC and Dust Groups IIIA, IIIB, IIIC. Occasionally referred to as "potting glands", they provide a compound barrier Ex d & IP seal on the cable inner cores, eliminating damage to cables that exhibit "cold flow" characteristics and an environmental seal on the outer sheath. The unique features include, "CROCLOCK®", the non reversible multi clamping system for wire (W), braid (X) and tape (Z) armoured cables and Peppers T-1000, the sealing compound that enables a quick and easy installation. The innovative barrier chamber provides a cable acceptance that is on average 17% greater than other designs. The gland maintains IP66 & IP68 to 100 metres and is deluge proof without the use of an additional seal or deluge boot. It is supplied with an IP O-ring seal as standard on metric entry threads and options are available for use with lead sheath.

Materials:	Brass or Stainless Steel
Plating:	Nickel - Zinc
Compound:	Peppers T-1000 Sealing Compound

Example Part Numbering CR-CBCK1/NP/20/M20

(See below for details)

CR-C	Type of gland featuring "CROCLOCK®", single orientation clamping, Compound (Barrier) Inner Seal & Silicone Elastomeric Outer Seal
2	For Lead Sheath Cables
B	Brass (B) / Stainless Steel (S)
R	Reduced Bore Seal
C	PVC Shroud (C) - PCP Shroud (P) - LSOH Shroud (3)
K or V	Locknut, Earth Tag & Nylon (K) or Fibre (V) IP Washer
S	Including Serrated Washer
1	Quantity per kit
NP	Nickel Plated (NP) - Zinc Plated (ZP)
20	Gland shell size
M20	M20 Entry Thread
Optional Accessories	Locknut Brass (ACBLN) / Stainless Steel (ACSLN)
	Earth tag Brass (ACBET) / Stainless Steel (ACSET)
	IP Washers Nylon (ACNSW) / Fibre (ACFSW)
	Serrated Washers Stainless Steel (ACSSW)
	Shrouds PVC (ACSPVC) / PCP (ACSPCP) / LSOH (ACSSIO)

Curing Time: @ 21 °C
 Conductor termination can be effected after 1 hour
 The equipment can be energised after 4 hours
 Compound chamber can be fully inspected after 4 hours

- Notes:
- * Gland size does not necessarily equate to the entry thread size.
 - * The IP O-ring seal is only available on metric entry threads. IP washers can be supplied for tapered entry threads.
 - * Please ensure that the IP O-ring is not used in conjunction with a flat IP washer.
 - * Dimensions (A) & (B) may differ for glands with non metric entry threads. Please refer to our "Thread Reference Tables" for specific dimensions.
 - * Where glands are fitted into non-metallic Ex e enclosures they must be included within the earth circuit of the system.
 - * The user should seek expert advice if intending to combine flammable and combustible dust in one environment/installation.
 - * Assembly instructions must be read prior to installation and adhered to in full.
 - * Peppers supply cable glands with parallel entry threads that conform to the flameproof threaded joint requirements of IEC/EN 60079-1 and other equivalent standards. They usually incorporate a thread run out according to the available machining techniques and will not have a full form thread for the entire length. Peppers will not be held responsible for clients' installations where this has not been taken into account.
 - * To maintain the specified IP rating, clearance holes must be in accordance with EN 50262 Table 1 and the entry device should be suitably secured.
 - * The gland is supplied with the correct amount of the two-part compound, gloves and instructions to allow one complete termination.
 - * Gland kits can be supplied with a PTFE IP washer in order to maintain the temperature range if required.
